**DETAILED ACTION*****Election/Restrictions***

Applicant's election with traverse of Group I, claims 1-12, in the reply filed on 11/10/04 is acknowledged. Claims 13-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant has also elected the species of formula (4) for fluoromonomer A and the species of formula (2) wherein SO<sub>2</sub>X is SO<sub>3</sub>H for fluoromonomer B. Applicant stated claims 1-12 read on the elected species.

However, it is unclear how the species of claim 5 read on elected formula (4) in claim 3. For example, claim 5 recites "perfluoro(3-butenyl vinyl ether)", which is not cyclic. Applicant states on page 16 of the amendment filed 5/19/05 that the alkenyl moiety will form an alicyclic structure when the claimed polymer is formed. Examiner points out that formula (4) is indicative of a fluoromonomer. Thus, it does not appear that at least "perfluoro(3-butenyl vinyl ether)" reads on the elected species.

*Therefore, Examiner is requiring a further election of species for fluoromonomer A. Applicant must elect a specific compound (no variables) that reads on elected formula (4).*

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1745

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Donald Drummond on 8/4/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1745

Note the rejection of claims 1-12 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,610,789 is withdrawn. A proper terminal disclaimer has been filed.

The prior art rejections contained in the Action of 12/9/04 appear to have been overcome by the amendment filed on 5/19/05.
